2022 , CGPA - 9.0

Experience

(i) Frontend Developer @ Leveraged Growth (March 2024 - Present)

- Working on **React JS** and **Tailwind Css** to build new platforms for students.
- Updating existing platforms in **React** to optimize and add more new features

(ii) Software Developer Intern @ The Mango Jelly (December 2022 - December 2023)

- Worked on **React JS** and **Material UI** , also contributed to the backend apis (**Node Express**).
- I was responsible for developing the entire web app **from scratch** to its first phase.

Projects (More projects on my portfolio above)

(i) OriginAI - An AI tool. [view](#)

- A **Fullstack** Saas like AI tool developed using **Next JS** , **Typescript** and **Tailwind Css**.
- **Complete User Authentication** using email or Google with a beautiful landing page.
- It has features like code generation , music , video and image generation or it can act as a general chatbot for questions answers.
- Users will be given a total of 5 generations if they want to do more they can subscribe and proceed.

(ii) Connect- A Social media website. [view](#)

- A **Fullstack** web app developed using **MERN Stack** and **Material UI**.
- With Features like User Authentication , CRUD posts , comment , search , like and dislike comment like and dislike posts any many more. It also has stories features like add , delete , update stories .
- Dark and light mode with a fully responsive UI.

(iii) Pijja - Online Pizza Ordering Website. [view](#)

- A **Fullstack** dummy web app developed using **MERN Stack** and **SCSS**.
- Full flow from **viewing pizzas to payment is maintained** , one can also view orders , orders status and order info etc. (both payment options available COD as well as Online Using Razorpay).
- It comes with a **Complete User and Admin authentication** where admin can see all users , orders , change order status etc.
- Also has a basic admin dashboard with some stats like total orders , users earnings etc.
